EXPERIENCE

Presto InfoSolutions Pvt Ltd | Certificate

Delhi, India

Software Engineering Intern

Jun 2026 – Jul 2026

- Architected a **7-stage hybrid multilingual text processing pipeline** for image-based **text removal**, OCR, translation, and re-rendering with **SSIM-driven quality assessment** and intelligent fallback between on-device and backend execution paths.
- Built an end-to-end system using **React Native**, **ML Kit**, **OpenCV**, **LaMa**, **PaddleOCR**, **Argos Translate**, **IndicTrans2**, and **Skia**, supporting multilingual workflows across **80+ language scripts** through PaddleOCR's multilingual recognition capabilities.
- Developed style-aware multilingual text re-rendering with best-effort preservation of **font, color, size, script, and layout**, enabling high-resolution export and seamless rendering across both execution paths.

Google Developer Groups (GDG) On Campus – LNMIIT

Aug 2025 – May 2026

Technical Member (AI ML Domain)

Jaipur, India

- Collaborated on **AI/ML and full-stack development** initiatives across technical workshops addressing real campus problems.
- Architected and launched the official website for sports fest of college, **Desportivos**. A fully responsive platform built with **React.js** and **Tailwind CSS** using **scalable component-driven architecture**, serving **2,000+ attendees** on the official college domain by working with a 8-member team.

PROJECTS

FlowGate – Unified LLM Gateway & Control Plane | LINK

Python 3.11 | Redis | Qdrant | Docker | OpenTelemetry | Prometheus | Grafana | Gunicorn

- Architected an **OpenAI-compatible LLM gateway** that unified **semantic caching**, **Redis-backed rate limiting**, **budget enforcement**, and **multi-provider routing** behind a single API for OpenAI and Anthropic.
- Implemented a **Qdrant-backed semantic cache** with adaptive similarity thresholds and TTL-based invalidation, achieving a **49.5% hit rate** in load testing and reducing redundant provider calls.
- Implemented **atomic Redis token accounting** with reserve-then-settle budgeting, priority queuing, retries, circuit breakers, and tier-based fallback, validated under **5,000+ concurrent requests** with sub-millisecond middleware overhead.
- Engineered production observability and deployment with **OpenTelemetry**, **Prometheus**, **Grafana**, and **Docker Compose**.

LowKey Secure – Privacy-First Event Access System | Site Link

React 19 | FastAPI | SQLite | JWT | RSA-256 | Tailwind CSS

- Established a **consent-first identity platform** with strict **Role-Based Access Control** across **3 user roles** (Admin, Club Lead, Student) and structured, multi-stage **approval workflows**.
- Implemented a **centralized privacy engine** to classify event risk (**HIGH/MEDIUM/LOW**) and enforce **mandatory justification** for high-risk approvals, cutting unauthorized access requests.
- Implemented secure auth using **JWT** (24h expiry), **bcrypt password hashing**, and **RSA-256 credential signing**; built anonymized attendance tracking via **SHA-256 hashed tokens** across **multiple events**.
- Deployed an **AI Privacy Advisor using Llama-3** (via Groq), ensuring **zero PII transmission** by processing only numerical risk statistics.

LENS – AI-Powered ESG Claim Verification Platform | Link

FastAPI | LangChain | CohereLLM | spaCy | Tailwind CSS | Leaflet | React

- Developed an **AI-driven pipeline** using **PyMuPDF** and **LangChain with Cohere** to parse dense sustainability reports and extract **structured ESG claims automatically**, cutting manual review time.
- Developed a verification engine using spaCy-based Named Entity Recognition to identify corporate facilities and cross-reference evidence from **OpenWeatherMap** and **Google News RSS**.
- Designed a responsive **React dashboard** with dynamic **Leaflet maps** for facility tracking and an **automated risk-scoring system** with transparent AI-generated explanations.

EDUCATION

The LNM Institute of Information Technology

2024 – 2028

B.Tech in Communication and Computer Engineering | CGPA: 7.34

Jaipur, India

Salwan Public School

2022 – 2024

CBSE Class XII: 90% | CBSE Class X: 96%

Delhi, India

SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, SQL, Solidity, HTML/CSS, Golang

Backend & API Development: FastAPI, Spring Boot, REST APIs, Pydantic, SQLAlchemy, httpx, Uvicorn, Gunicorn

Data & Storage: Redis, Qdrant, PostgreSQL, SQLite, Firebase Realtime Database

Cloud, DevOps & Observability: Docker, Docker Compose, OpenTelemetry, Prometheus, Grafana, Google Cloud Platform (GCP), Vertex AI, Git, GitHub

Frontend & App Development: React.js, React Native, Streamlit, Tailwind CSS, Vite

AI / ML: LangChain, spaCy, PaddleOCR, Scikit-learn, Pandas, NumPy, NLP Pipelines

Security & Authentication: JWT, RBAC, Bcrypt, SHA-256, RSA-256
