EXPERIENCE

Presto InfoSolutions Pvt Ltd | Certificate — Delhi, India
Software Engineering Intern — Jun 2026 – Jul 2026

- Built a **7-stage hybrid multilingual pipeline** for image-based **text removal, OCR, translation, and re-rendering**, with **SSIM-based quality assessment** and on-device/backend fallback.
- Developed the pipeline using **React Native, ML Kit, OpenCV, LaMa, PaddleOCR, Argos Translate, IndicTrans2, and Skia**, supporting **80+ language scripts**.
- Implemented **style-aware text re-rendering** preserving **font, color, size, script, and layout**, with high-resolution export across mobile and backend paths.

Google Developer Groups (GDG) — Jaipur, India
AI/ML Domain Member — Aug 2025 – May 2026

- Architected and launched the official website for the college sports fest, **Desportivos**, using **React.js and Tailwind CSS** with a **component-driven architecture**, serving **2,000+ attendees** on the official college domain as part of an 8-member team.

PROJECTS

FlowGate – Unified LLM Gateway & Control Plane | Repo
Python 3.11 | FastAPI | Redis | Qdrant | Docker | OpenTelemetry | Prometheus | Grafana | Gunicorn

- Built an **OpenAI-compatible LLM gateway** for OpenAI and Anthropic, integrating **multi-provider routing, semantic caching, Redis rate limiting, and budget enforcement**.
- Developed a **Qdrant semantic cache** with adaptive thresholds and **TTL invalidation**, achieving a **49.5% cache hit rate**; added **atomic Redis token accounting**, reserve-then-settle budgeting, and priority queuing.
- Added **retries, circuit breakers, and tier-based fallback**, validating **5,000+ concurrent requests** with **sub-millisecond middleware overhead**; deployed with Docker Compose/Gunicorn and monitored using OpenTelemetry, Prometheus, and Grafana.

BotBeacon – AI Commerce Gateway & Merchant Growth AI | Repo | Live
Paytm Build for India Hackathon Finalist | Python 3.11 | FastAPI | React | PostgreSQL | SQLAlchemy | MCP | n8n

- Built a **dual-sided AI commerce gateway** with **5 MCP tools** for catalog search, product retrieval, cart building, policy checks, and checkout, protected by **deterministic spending and merchant policy gates**.
- Developed a **Gemini Merchant Copilot** with **real-time SSE streaming** and SQL opportunity detection, identifying a **37.5% sales decline (8 to 5 units/week)** and cross-sell opportunities.
- Automated merchant campaigns through **n8n** with **double policy re-evaluation**, generating **10% bundle recommendations with Rs. 2,999 exposure** and maintaining an **immutable audit trail**.

LowKey Secure – Privacy-First Event Access System | Repo | Live
React 19 | FastAPI | SQLite | JWT | RSA | Tailwind CSS

- Built a **consent-first event access platform** with **Role-Based Access Control** for **3 roles** (Admin, Club Lead, Student) and multi-stage approval workflows.
- Developed a **privacy engine** for **HIGH/MEDIUM/LOW risk classification** and high-risk approval justification; secured authentication with **JWT, bcrypt, and RSA-256** and anonymized attendance using **SHA-256 tokens**.
- Deployed a **Llama-3 AI Privacy Advisor** via Groq that processes only numerical risk data, ensuring **zero PII transmission**.

LENS – AI-Powered ESG Claim Verification Platform | Repo
FastAPI | LangChain | CohereLLM | spaCy | Tailwind CSS | Leaflet | React

- Built an **AI pipeline** using **PyMuPDF and LangChain with Cohere** to parse sustainability reports and extract **structured ESG claims**, reducing manual review.
- Developed a **spaCy NER verification engine** to identify corporate facilities and cross-reference evidence from **OpenWeatherMap and Google News RSS**.
- Built a **React dashboard** with **Leaflet maps** for facility tracking and an **automated risk-scoring system** with transparent AI explanations.

EDUCATION

The LNM Institute of Information Technology — 2024 – 2028
B.Tech in Communication and Computer Engineering | CGPA: 7.34 — Jaipur, India

Salwan Public School — 2022 – 2024
CBSE Class XII: 90% | CBSE Class X: 96% — Delhi, India

SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, SQL, Golang
Backend & APIs: FastAPI, Spring Boot, REST APIs, Pydantic, SQLAlchemy, httpx, Gunicorn, Uvicorn
Databases, Cloud & DevOps: PostgreSQL, Redis, Qdrant, SQLite, Docker, Docker Compose, GCP, OpenTelemetry, Prometheus, Grafana
Frontend & AI Engineering: React.js, React Native, Tailwind CSS, LangChain, Gemini API, Cohere, spaCy, PaddleOCR, OpenCV, PyMuPDF, Pandas, NumPy
Security, Testing & Tools: JWT, RBAC, Bcrypt, SHA-256, RSA-256, Pytest, Git, GitHub
